PROFESSIONAL SUMMARY

Detail-oriented MCA student with strong proficiency in Java, Spring Boot, SQL, and full-stack web development. Experienced in building REST APIs, backend systems, and AI-integrated applications through academic and internship projects. Passionate about problem-solving, clean code practices, and continuously improving technical skills to contribute effectively in a software development role.

TECHNICAL SKILLS

Programming Languages: Java, Python, SQL, JavaScript

Frameworks & Libraries: Spring Boot, React, Node.js, Express.js, Bootstrap, TensorFlow

Databases: MySQL, MongoDB

Tools: Git, GitHub, Maven, Postman, Docker

Core Concepts: RESTful APIs, Authentication & Authorization, MVC Architecture, Object-Oriented Programming (OOP)

PROJECTS

Student Fees Management System

Tech Stack: Java, Spring Boot, Angular, MySQL, Spring Data JPA, Maven, Docker

Live Demo: <https://fees-frontend.onrender.com>

- Developed full-stack fee management system with RESTful APIs and layered architecture.
- Implemented authentication and role-based access control.
- Integrated MySQL using JPA for efficient data handling.
- Deployed frontend on Render and containerized backend using Docker.

Store Rating System

Tech Stack: React, NestJS, Node.js, MySQL, TypeORM, JWT

- Built a full-stack rating platform enabling users to browse stores and submit feedback.
- Implemented JWT-based authentication and role-based authorization (Admin/User).
- Developed REST APIs using NestJS for user, store, and rating management.
- Designed relational database schema and managed data using MySQL & TypeORM.

VeggieBox – AI-Powered Grocery & Nutrition Assistant

Tech Stack: Node.js, Express.js, MongoDB, Tesseract.js, Docker

- Developed an AI-powered backend system that analyzes grocery lists using OCR technology.
 - Integrated Tesseract.js for image-to-text extraction and intelligent food analysis.
 - Built REST APIs for validation, parsing, and nutrition recommendations.
 - Configured Docker-based environment for deployment and scalability.
-

INTERNSHIP

AI-ML Virtual Intern

EduSkills x Google for Developers | Apr 2025 – Jun 2025

- Developed Android applications integrating TensorFlow and ML Kit.
- Implemented image classification and object detection models.
- Utilized Google Cloud Vision API for real-time image analysis.

EDUCATION

MCA, JSPM University, Pune (2024 – 2026) | Expected: 70–75%

BCA, Shivaji University (2021 – 2024) | 75%

CERTIFICATIONS

- Hardware & Networking Certification
- Artificial Intelligence and Its Applications – Faculty Development Program (AICTE), JSPM University
